

***“The Susan and Henry Samueli College of Health Sciences has been established as a first-of-its-kind alliance across health disciplines, merging their strengths to transform healthcare and wellness. Seamless transfer of advances into practice at UCI Health and collaboration with extraordinary colleagues throughout the university amplify our impact. We have big dreams for the future because we know it is our responsibility to do what others cannot and then share what is possible.”***

**— Steve Goldstein, M.D., Ph.D.**  
*Vice Chancellor, Health Affairs*

The Susan and Henry Samueli College of Health Sciences and UCI Health are building bridges across disciplines to create a transformative model of discovery, teaching and healing. Our health sciences students benefit from a unique interprofessional approach to education that brings together in one college the School of Medicine, the Sue & Bill Gross School of Nursing, the planned School of Pharmacy and Pharmaceutical Sciences, and the planned School of Population and Public Health. With the Susan Samueli Integrative Health Institute as a foundational partner, we are advancing an integrative model of wellness and team-based care for the whole person.

We invite you to make our impact a part of your own legacy. Please join us as we advance the frontiers of knowledge and educate a healthcare workforce that reflects the diversity of our community and our world.

## Campaign Funding Priorities

### **Clinical Research Across Disciplines**

Gifts for interdisciplinary clinical research will foster trailblazing collaborations in areas such as artificial intelligence, neurotherapeutics, precision medicine, infectious diseases, human genetics and epigenetics. The greatest advances emerge at interdisciplinary boundaries, and this is where we dedicate ourselves to improving lives. A new, state-of-the-art building will enable us to reach our full potential and to recruit and retain top investigators.

### **Integrative Healthcare Across Medical Services**

Your investment will allow us to bring the integrative framework to all medical subspecialties, outpatient and hospital-based, including cardiology, gastroenterology, oncology, neurology and psychiatry. Funding will also cover educational opportunities and fellowships for the next generation of integrative health specialists.

### **Institute for Clinical and Translational Science**

With your partnership, the ICTS will turn science into care and translate discoveries into cures. One of only 65 centers throughout the country funded by the National Institutes of Health, we catalyze, incubate and develop new approaches to train the next generation of leaders of biomedical research, to stimulate seed projects that address pressing health needs, and to rapidly integrate new research into practice.

### **Interprofessional Education and Care**

Our unique approach to interprofessional education will allow students in the health sciences to excel as members of high-performing healthcare teams of the future. Your gift will create programs and enable students in medicine, nursing, pharmacy and pharmaceutical sciences, and population and public health to participate in collaborative learning and hands-on training while developing an in-depth understanding of evidence-based, integrative health. This approach will yield professionals who stay at the cutting edge because they are lifelong learners and thereby able to offer their patients the best care as clinical practices rapidly advance.

### **School Naming Opportunities**

Your gift to name the School of Medicine, the planned School of Pharmacy and Pharmaceutical Sciences, or the planned School of Population and Public Health will galvanize support for our transformative vision. The success of our talented students and dedicated faculty will be linked with your generosity for generations to come.
